The Honorable Dan Burton, Chairman
House Government Reform and Oversight Committee
c/o Milt Copulos / Beth Clay
Room 2157 RHOB
Washington, DC 20515

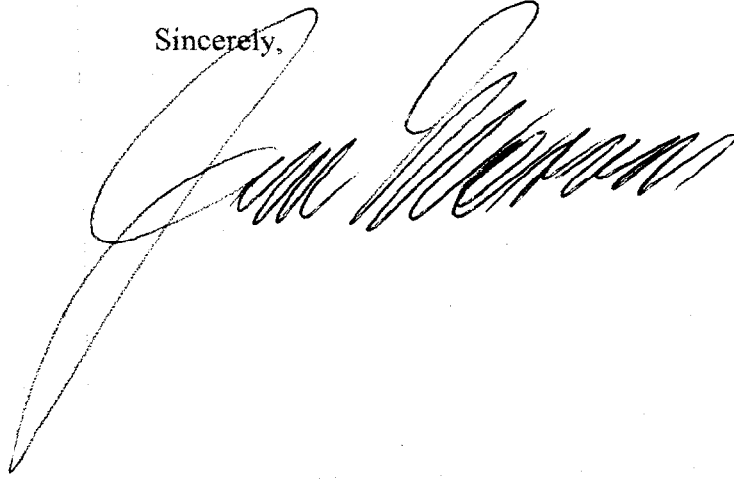

Dear Congressman Burton:

As a lifelong Republican, deeply troubled by the number of intrusions of the Federal government into so many aspects of American life, I urge you to diligently insist that the FDA follow your committee's requests concerning dietary supplements.

I'm 70 years old, in excellent health for that age, and credit much of this to judicious use of such supplements as vitamin C, E, and B.

Please don't let the FDA force us into having to use the black market or travel to Mexico to obtain supplements.

Sincerely,

A large, stylized handwritten signature in black ink, likely belonging to James L. Marvin, written over the "Sincerely," text.
